

WeekReport_2018-03-04_03-17_E

Two Week Overview

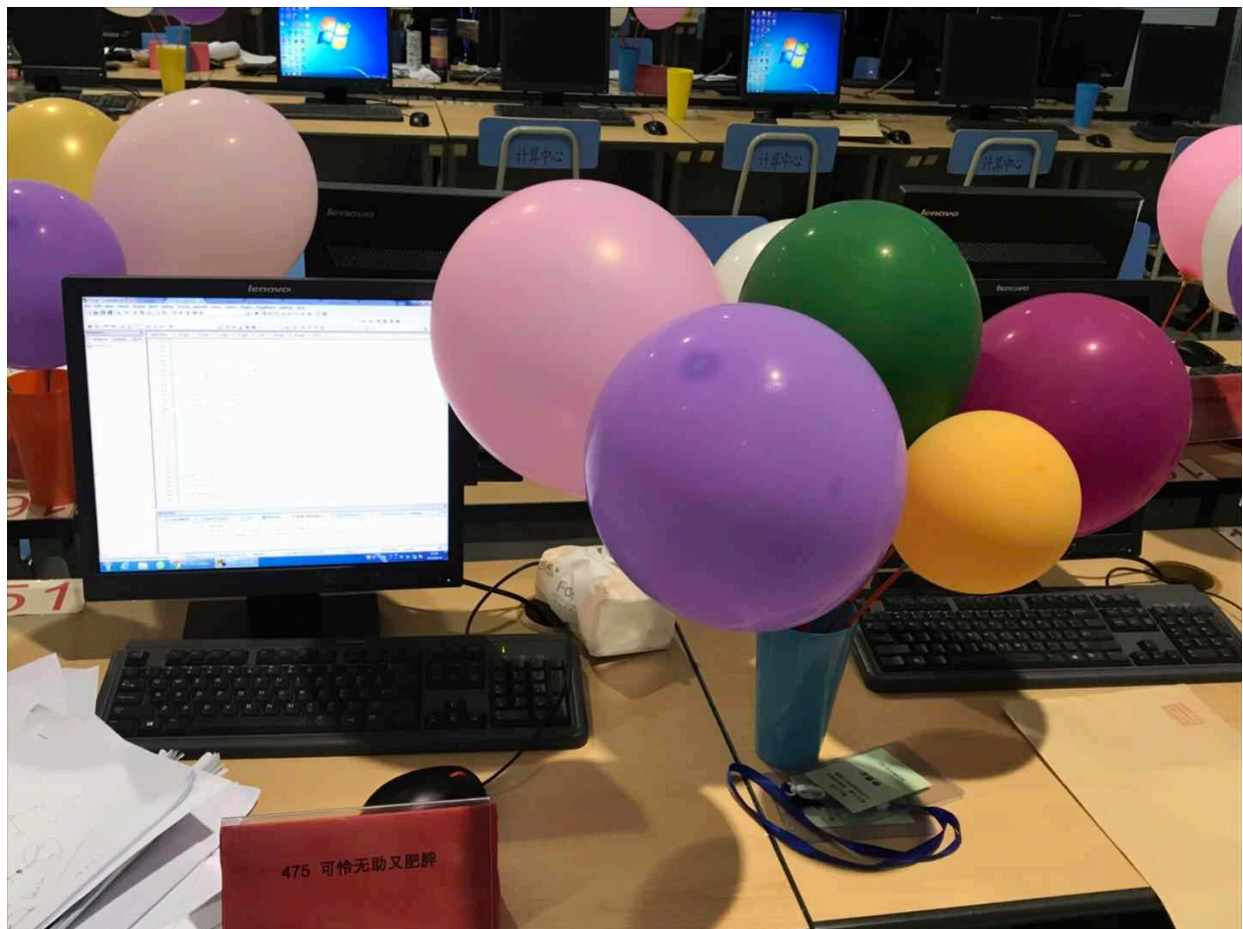

- This week I continue the GrpahLayout project

Project: GraphLayout

- I reinstalled my computer. After many attempts, I found out why the driver was not well installed. In short, my computer has some unexplained bugs. Even if I ask some seniors to help me, I can't explain it. No matter what, it can be used now.
- I rewrote the test code and script of ogdf part. But the code of GRIP is not available, I replace it with tulip
- tsnet and tsnet* are modified too for our own dataset, and I replace the precomputed PMDS with tulip
- next week I will focus the code modify of our own algorithm and merge Shaojie's GPU code.

Attend Zhejiang University Programming Contest

- we solve 6 problems and got 27th rank !

Other

- attend the codejam roundA
 - study some react.js
-

Short-term perspective

Work	deadline	Tip
Merge Shaojie's Code	Tue	data2video

Long-term perspective

Work	deadline	Tip or Progress
GraphLayout	6.1	modify the GPU
